

YOUR EMAIL INSTALLATION GUIDE

POSTBOX FOR MAC

121

Please have your provided HTML file available and ready to install. Then simply follow the steps below to have your signature set-up in Thunderbird for Mac within minutes.

STEP ONE

Open your provided Email Signature HTML file in Google Chrome or Mozilla Firefox.

IMPORTANT: Do NOT use the Safari web browser as it will cause formatting issues with your email signature and cause images to stack vertically.

STEP TWO

2

Now that your email signature is open in a new window, press **Command + A** to highlight the signature, then press **Command + C** to copy the signature.

Have a great day.

STEP EIGHT

Close out of your Preferences and compose a new email. You will likely see borders around the tables and cell of your email signature, this is completely normal and they won't appear when your recipient receives your email.

All done! Your email signature is now installed within Postbox for Mac!
